Mayor's Report.

To the citizens of the City of Rutland:

I have the honor to make report for the fiscal year ending December 31, 1912.

FINANCIAL

During this fiscal year, as heretofore, we have paid our interest and sinking fund obligations, and the net bonded debt of the city has been decreased by the amount of \$18,480.44, for which the voters are to be congratulated, etc., but as a matter of fact, rather than of figures, we have failed to pay our necessary running expenses and discharge our absolute obligations as they became due.

A reference to the report of the treasurer shows that, after deducting the amount belonging to the department of streets and sidewalks, we had \$199.30 less cash in the general fund at the end than at the beginning of the year, besides a \$7,000 outstanding temporary loan warrant. This makes the apparent deficiency for the year \$7,199.30. So far as known to the Board of Finance no bills have been carried over this year, except the claim of Burton & Creed for the construction of the culvert on North Main Street, which is in litigation and is carried from the year 1911, and the temporary loan warrant above referred to. There were carried over, however, from the year 1911, and paid during the year 1912, bills payable from the general fund amounting to \$1,161.11; so that the real deficit for the year 1912 is \$6,038.19. Nor is this by any means the first

CITY OF RUTLAND

23

year to show such a deficit. Computed upon the same basis the year 1909, with a tax rate of \$1.60, shows a deficit of \$16,499.86; the year 1910, with a tax rate of \$1.60, shows a deficit of \$24,594.26, and the year 1911, with a tax rate of \$1.80, shows a net gain of \$216.09. Following is a statement covering the four years since the adoption of the present charter:

Fiscal year 1909, Tax Levy \$1.60.	
Cash on hand January 1	\$8,179 42
Unexpended appropriation, streets.....	None
Unexpended appropriation, sidewalks	None
Net cash for general purposes	\$8,179 42
Cash on hand December 31	\$4,270 27
Unexpended appropriation, streets	\$2,362 30
Unexpended appropriations, sidewalks ..	228 41
	2,590 71
Net cash for general purposes	\$1,679 56
Net cash January 1	\$8,179 42
Net cash December 31	1,679 56
Net cash deficit	\$6,499 86
Cash taken from water fund	10,000 00
Total deficit	\$16,499 86

No bills appear to have been carried over.

Fiscal year 1910, Tax Levy \$1.60.	
Net cash January 1, see above	\$1,679 56
Cash on hand December 31	\$2,185 60
Unexpended appropriation, streets	\$3,062 73
Unexpended appropriation, sidewalks....	37 57
	3,100 30

Net deficit in cash for general purposes..	\$914 70
Net cash January 1	\$1,679 56
Net deficit December 31	914 70
Net cash deficit	\$2,594 26
Cash taken from water fund.....	22,000 00
Total deficit	\$24,594 26

Fiscal year 1911, Tax Levy \$1.80.

Net cash deficit January 1, see above	\$914 70
Cash on hand December 31	\$3,501 78
Unexpended appropriations, streets	\$1,186 43
Unexpended appropriation, sidewalks... ..	1,852 85
	3,039 28
Net cash for general purposes.	\$462 50
Net cash deficit (paid in 1911)	\$914 70
Net cash on hand December 31	462 50
Net cash gain	\$1,377 20
Bills carried to 1912	1,161 11
Total gain	\$216 09

Fiscal year 1912, Tax Levy \$1.70.

Net cash January 1, see above	\$462 50
Cash on hand December 31	\$3,308 33
Unexpended appropriation, streets	\$2,962 62
Unexpended appropriation, sidewalks ...	82 51
	3,045 13
Net cash for general purposes	\$263 20
Net cash on hand January 1.....	\$462 50
Net cash on hand December 31	263 20

Net cash deficit	\$199 30
Temporary loan warrant outstanding ..	7,000 00
Total deficit	\$7,199 30
Bills from 1911 paid in 1912	1,161 11
Net deficit	\$6,038 19

NOTE.—The 20 percent appropriation to highways is made by law, no part of it can be expended for any other purpose, and it is as absolute an obligation as a state tax. This includes both streets and sidewalks, but for convenience the accounts are carried separately upon the books of the treasurer.

NOTE.—Under the present charter no moneys can lawfully be taken from the water fund for general purposes. The moneys so taken in 1909 and 1910 have been substantially replaced by the bond issue voted at the annual election in 1911 to be paid from the general fund. The water department to this time has not been obliged to use the proceeds of these bonds, and the bonds have not been issued.

THE TAX LEVY.

Although the foregoing would seem to prove conclusively that the city cannot pay its necessary running expenses and meet its current obligations upon a tax levy of less than \$1.80, I wish to carry the subject a step farther and show where a small tax levy pinches the administration and what a larger tax levy can do for us.

Take for example the tax levy of 1912. Again referring to the treasurer's report we find that the grand list was \$95,508.72, and that the levy of \$1.70 was made up of schools 50 cents, highways 20 cents, state school 8 cents, state highway 5 cents, sinking fund $9\frac{1}{4}$ cents and county $\frac{1}{4}$ of one cent. These are all fixed and absolute obligations that must be met, and there remains only $77\frac{1}{2}$ cents applicable to general city pur-

poses. If all the taxes were collected this 77½ cents would yield \$74,019.26, but from this sum must be deducted *all* abated or uncollectable taxes (during this year a single abatement has been made amounting to \$816.00), together with the interest charges upon our indebtedness, which this year, including interest upon temporary loan warrants amounts to \$23,880.41. Making these deductions we have left a sum somewhat less than \$50,000 with which to provide for the departments of charities and corrections, police, fire, sewers, health, salaries, lights, hospital, library, band, grand army, carnival, the care and maintenance of city property, extra appropriation to obtain state aid, or otherwise in building permanent highways, highway bridges, and the multitude of minor expenses necessarily incident to the conduct of a city government, as well as many things we would like and ought to have but cannot on account of lack of funds. It is in the administration of these departments and purposes only that efforts toward economy can be directed, all our other expenses being absolutely fixed by law, or, as in the case of interest, by contract. It is also to *these departments and purposes only* that a raise in the tax levy will contribute. There is no money that a resident can expend or invest that will pay him so large a return as the money he pays in taxes when wisely expended for local purposes. Personally I would like to see the tax levy raised to \$2.00 and these local departments so wisely administered that to be a resident of Rutland would not only be a matter of personal pride but of substantial benefit.

STREETS AND HIGHWAYS

Under our present charter the commissioner of public works is given all the powers of street commissioners in towns, together with all the powers of select-

men. By the same instrument the mayor and board of aldermen are made the equivalent body of the selectmen of the towns. Neither the mayor nor the board of aldermen, severally or in their joint capacity, have therefore any legal control over the commissioner of public works in the administration of the department of streets and highways. With this absolute power ought to go the full responsibility for the administration of this department. At the opening of the season of 1911 the street commissioner determined to try the experiment of using motor power rather than horses for moving materials in this department. This determination, as I understood it at that time, was with the approval of a large majority, perhaps of all, the members of the city council, and an automobile truck was accordingly purchased at an expense of between five and six thousand dollars. For the year 1911 no appropriation was made for highways except the twenty per cent appropriated by law. As the truck was expected to last for several years, at the time of its purchase it was determined to divide the purchase money between the years 1911 and 1912. During the year 1911, however, so much was expended upon highways that the appropriation was exhausted without paying anything upon the purchase money of the truck. During the year 1912 no appropriation has been made to highways except the twenty per cent appropriated by law. From this appropriation payment for the motor truck has been made, together with such other work as it was possible to do and keep within the appropriation. The motor truck is still on hand, and reported to be in good condition, except the tires which must be renewed before it can be used. Notwithstanding the fact that the renewal of the tires involves a considerable expense, I am of the opinion that

the reasonable use of a motor truck in this department is an economy rather than otherwise.

At the present session of the Legislature, the amount of money which the state road commissioner is authorized to allow to a municipality for the purpose of building state road, provided the municipality votes a corresponding sum, has been raised to one thousand dollars, and I trust our citizens will vote to take advantage of this opportunity.

Good roads and how to build them is a subject now engaging the active attention not only of each local municipality but of the state and of the nation. Developments and discoveries as to conditions, materials and methods are of almost daily occurrence. The subject in fact has become almost a science, and any recommendation on my part to the newly appointed commissioner of public works would be presumptuous.

WATER

By reason of the constant agitation of the past few years, this has become a particularly important department; and, as the commissioner of public works in his report has treated it rather sparingly, I trust I may be pardoned for giving it what might otherwise be deemed undue prominence. Although included in the department of public works, the commissioner of that department in respect to water is at all times subject to the direction and control of the city council.

It has been claimed that our present supply is insufficient in quantity and unfit or at times unsafe for use for domestic purposes.

The investigation of the last two years has demonstrated the fact that our present supply is sufficient in quantity for a city of from 30,000 to 35,000 inhabi-

tants at all times and for all purposes, when supplemented with reasonable storage.

The automatic bleach plant which was installed in 1911 has been kept in constant operation during the year 1912. I have had people tell me that they were confident that the use of this bleach had rendered the water nauseous, had caused their tea kettles, etc., to become discolored and show a deposit from the water upon boiling, even that it had injuriously effected their health. I cannot think this can be true. At least since June 1912 all the bleach used has been weighed, it has then been thoroughly mixed and introduced into the canal through which the water flows for a long distance over a stony bottom before entering the reservoir; during this time the water has been measured daily and the amount of bleach used has never exceeded one grain to ten gallons of water. Whether or not the bleach has made the water any better it certainly has not made it any worse.

In view of the then agitation over the water question in the spring of 1911, it was determined by the city council that something ought to be done to improve the system. To do this, however, would require an issue of bonds to provide the ready money, the bonds of course to be subsequently paid out of the water money, and bonds could not be issued without a vote of the people. The mayor proposed to build a filtration plant, a storage reservoir by throwing a dam across the Mendon stream, and lay a new pipe line from the reservoir to the city. A majority of the board of aldermen were opposed to this proposition of the mayor, but were in favor of building a storage reservoir, so located that the road and surface wash in times of heavy rains and melting snows could be shut out of it and thus avoid filtration, and a committee of the city council was ap-

pointed to investigate this proposition and report. A special election was called and the mayor's proposition was submitted to the voters by way of a bond issue, with the result that a vote was registered against the proposition of approximately three to one. The same proposition was again laid before the voters at the annual election in 1912, with the result that a vote was again registered against it by a still larger majority. The mayor resigned his office June 10, 1912. Subsequently, the committee of the city council having concluded its investigation and reported, the proposition of building a storage reservoir was submitted to the voters by way of a bond issue, with the result that a vote was registered against this proposition by quite as large a majority as that against the former one. Just what the voters mean by this I confess I do not understand; but if something ought to have been done to improve the water situation, it is up to the voters and not to the city council.

And surely something ought to be done. It matters not whether the trouble is in the water or in the health authorities, it is trouble just the same, and I am afraid the average voter fails to appreciate the extent to which it operates to the detriment of the prosperity of the municipality and the business interests of its citizens.

The financial affairs of the water department are in a prosperous condition. It now has \$19,297.88 in cash on hand beside the \$30,000 of unissued bonds. This would justify a substantial reduction in the water rates were it not for the fact that extensive changes, renewals and repairs must presently be made in and to the system within the city, beside the work that ought to and must be done at its reservoir plant and upon the watershed. Such a reduction, however, must surely come, for when the system is brought to standard the present rates will

be more than sufficient for its reasonable maintenance and extension.

SEWERS.

In this department you will note the recommendation of the commissioner of public works with respect to new construction. There are also other quarters of the city in which sewers ought to be built. It is difficult, however, to see how much work of this character can be done and paid for without a raise in the tax levy.

PUBLIC SAFETY.

In the death of Mr. Chamberlin, the commissioner of this department, the city has lost a faithful and most efficient official.

To the recommendations contained in the report of the present commissioner I wish to add two of those of one of his predecessors, Mr. Patch, namely: the employment of an electrician and the providing in the city hall of reasonably decent facilities for a lockup or jail.

LIGHTS.

This is an important department of the city and has received considerable attention during the past year. The existing contract between the city and the Rutland Railway Light & Power Company expires April 1, 1913. During the year some controversy arose between the board of finance and the Rutland Railway Light & Power Company in respect to the light bills, and in its adjustment a circuit of magnetite lamps was installed in the business section of the city. In this adjustment it further appeared that the present equipment for street lighting, outside of the circuit above referred to, is entirely inadequate for the purpose, and further that the installa-

tion of a proper equipment should be an economy for both the light company and for the city.

SALARIES.

No business requires more careful, conscientious and efficient service than that of a municipality, and such service cannot be obtained without an adequate compensation. Many of the unsatisfactory conditions in the administrations of the affairs of the city are directly traceable to a false economy in this respect.

CHARITIES AND CORRECTIONS.

The disbursements in this department would have been unusually low had it not been for several cases of small pox, the persons afflicted having become, by reason of this misfortune, charges upon the city.

HEALTH.

The expenses of this department have hitherto been distributed between the general account and that of the department of charities and corrections. I would recommend that hereafter this subject be considered as a separate department and an account of its receipts and disbursements be kept by the treasurer as a separate account.

RUTLAND CITY HOSPITAL.

We are much indebted to this institution for the liberal spirit in which its management has interpreted and performed its contract with the city. I hope to see the time when our finances will permit a more liberal appropriation to this most worthy charity.

CITY BUILDINGS.

Considerable repairs and alterations ought to be made in the City Hall building, chiefly with reference to the better accommodation of the police department, and for properly heating the building.

Memorial Hall and grounds have been allowed to become actually delapidated, and even the repairs necessary to the preservation of the structure will involve a considerable expense.

BRIDGES.

There are several highway bridges in the city which must be rebuilt or extensively repaired. Under the law this expense is taken from the general fund and not from the highway fund. Repairs of a temporary nature have been made upon these structures during the year 1912, but nothing further could be accomplished on account of lack of funds.

CONCLUSION.

In conclusion, lest I be thoughtlessly accused of having failed to practice what I preach, permit me to remind you that I became your mayor only by operation of law to fill a vacancy in that office, and at a time when the appropriations, appointments and tax levy had already been made and the plans and policy for the year inaugurated. Under these circumstances it appeared best to endeavor to carry out the established policy without attempting to impress upon the administration any peculiar ideas of my own.

Respectfully submitted,

CHAS. L. HOWE,

Mayor.

Report of the City Treasurer

To the Honorable City Council:

Gentlemen: I herewith present to you my report as City Treasurer for the fiscal year ending Dec. 31, 1912.

RECEIPTS

Taxes received by City Treasurer	\$156,105 44

Respectfully submitted,

HENRY F. FIELD,
JOHN N. WOODFIN,
NEWMAN K. CHAFFEE,

Commissioners of Sinking Fund.

January 1, 1913.

Report of the Commissioner of Public Works.

To the Honorable City Council:

Gentlemen—The following is a statement of the work done by the department of Public Works during the year 1912.

STREETS.

The increasing traffic necessitates more street work each year. However, as quite a number of the busier thoroughfares have already been macadamized and as we get a slight increase yearly in the amount of the available funds we are able gradually to increase the total length of improved roadways. Nevertheless, the amount of money available for construction work this year was considerably below the normal; caused by the City paying for the auto truck from the 1912 funds.

We feel, however, that considering the limited funds we had to spend and the condition of our crusher, we have succeeded in doing a large amount of work. I would have much preferred to purchase a new crusher and use a harder stone if your Honorable Body had granted our request for the necessary money with which to install a crushing plant. Neither of our crushers is capable of crushing stone as fast as we can handle it with the truck unless the haul is an exceptionally long one. The North Main street crusher is practically worn out and the portable is rather small and considerably worn. Consequently, in order to carry on the street work economically, we should have a new and larger

crusher. We also need a new stone quarry, but it has been impossible to find local stone equal to trap rock for road-building.

I have sent samples from various ledges in this vicinity to testing laboratories. The reports from those tests indicate that our quarry on North Main street, also several other ledges near here, are not good road-building material except for use in a deep fill or as a foundation for a harder surfacing. The stone which appeared by the tests to be the best for road-surfacing was taken from the ledge on North Church street. Two laboratories stated that it was the best stone which had been sent to them by anyone from Rutland. I would recommend the purchase of this property at a reasonable price.

I also recommend the macadamizing of Spellman Terrace and Morse Place, and also the completion of the unfinished portion of macadam of South Main street, with the State road money.

STREET MACADAMIZED 1912.

STREET	Distance, Feet		No. Loads Stone	
	Length	Width	Truck	Team
Library Ave., from Baxter St. to Cleveland Ave.	300	18		108
Park Ave., from Harrison Ave. to Baxter St.	450	14	71

DRAINAGE.

There should be sewers constructed the coming season to take the house drainage from the northerly end of Lafayette street and the westerly end of Harrington avenue and Woodstock avenue easterly of the old reservoir, also Deer street about 400 feet north of Woodstock avenue.

The sewer near Pine street tunnel is still in a dangerous condition and should be permanently rebuilt at

once. The sewage from the southeast section of the City should be drained into the Moon Brook trunk sewer.

The amount of sewers built was less than usual.

SEWERS CONSTRUCTED 1912

STREET	Description	Length, ft.	Labor	Material
At Fair Grounds	6"	300	\$25 25	\$38 00
Franklin and Cherry Sts.	8"	48	11 63	8 50
So. Main St.	8"	66	8 50	11 88
Walnut St.	8"	394	40 05	54 00

		<hr/>	<hr/>	<hr/>
		882	\$119 93	\$223 67

Fourteen catch basins have been constructed at the following locations:

One on Main St. at High St.
 Two on High St. at top of hill
 One on Main St. at No. 70.
 One on Main St. at No. 54.
 One on Main St. at Clinton Ave.
 One on Main St. at Burnham Ave.
 One on Clover St., opposite No. 12.
 One on Crescent St., at No. 25.
 One on South St. at Granger St.
 One on First St., near Granger St.
 Two on Forest St. near Union St.
 One on Clinton Ave., near Main St.

Five catch basins have been built over:

One on State St.
 Two on Temple St.
 One on Crescent St.
 One on North Main St.

BRIDGES.

The covered bridge on West street has been straightened and shingled.

The plank floor on the Dorr bridge has been renewed and several minor repairs have been made to that and the various other bridges of the City.

During the spring rains and high water the Tenney Brook got partially blocked by driftwood between the Dunklee ice pond and North Main street, in such a manner that the stream was turned southerly into the roadway embankment south of the south abutment of the new concrete bridge. It washed an opening in the gravel and boulders about three feet deep under that south abutment from its easterly end westerly about ten feet lengthways of the bridge, causing that end of the south abutment to settle down and crack away from the other parts. That break ought to have been repaired during the past season, but owing to the litigation concerning the payment for its construction, the broken wall has only been blocked temporarily with boulders.

The River street bridge should be painted this season especially those sections of it which are directly over the tracks. The steam and gases from the locomotives corrode and honeycomb the steel work of the bridge very rapidly unless it is well protected by paint.

The North Grove street bridge near Crescent street and also the South Main street bridge at Mussey Brook should be built of concrete the coming season.

WATER SYSTEM.

The pipe and fittings for constructing a large main and placing two four-way hydrants near the driveway from West street to Baxter street, to better protect that section of the City in case of fire and also to supply more water for fire protection in the Baxter street and Cleveland avenue sections, have been purchased and should be installed as soon as possible. Then an eight-inch pipe should be laid from the south end of Baxter street northerly to State street.

Respectfully submitted,

F. R. BLANCHARD,
Commissioner of Public Works.

Report of the Commissioner of Public Safety.

To the Honorable City Council:

I respectfully submit the annual report of the Fire and Police Departments.

I was appointed Commissioner of Public Safety November 18, 1912, to fill out the unexpired term of the late Martin H. Chamberlin.

Our fire loss the past year, a list of which is appended, is the lowest in many years, being only \$11,591 80, which is fortunate. This loss can be reduced by the addition to our fighting equipment of a chemical motor truck with a capacity of not less than two thirty-gallon chemical tanks, and three hundred feet of hose. Nearly all fires are chemical fires, so-called, and when discovered, an alarm will bring a motor truck much quicker than a horse-drawn vehicle, regardless of distance. To reach a fire in its infancy is of great importance. Chemicals are ready for use as soon as the truck reaches the scene of the fire, and the fire is smothered by their use with much less damage than by water.

I respectfully recommend the sale of the old fire engine, and the purchase of a modern motor truck. To maintain one pair of horses and a driver costs approximately \$900 00 per year; the average cost to maintain a motor truck would not exceed \$150 00 per year. I recommend this exchange in the interest of economy and efficiency. Let us hope that in the near future our finances may permit of such an arrangement.

Many large fires are in a large measure the direct result of delay in calling out the department. Too many people attempt to fight their own fires. Of course this is quite proper after they have called the department, but it is frequently due to a fear of having their homes or property flooded with water. We are reasonably well supplied with hand chemical extinguishers, which render good service in a small fire. Over 50% of the fires in 1912 were smothered with the use of our present chemical equipment.

This report was not made up until after January 20, 1913, under which date, upon request, your board appropriated \$350 00 to improve the fire alarm system which is in bad repair. It is hoped this amount will place this system in first class condition. It is expected we will be obliged to renew about ten miles of the wires. We hope this will eliminate the frequent single blasts by the fire whistle, which have been the cause of a great deal of annoyance to the citizen as well as to members of the department.

HYDRANTS

The hydrants are all in good condition. A careful inspection was made during the month of December, 1912, and all caps were removed and greased. This inspection is of importance as at times it is found that neglect has caused the threads to rust, so that the hydrants are opened with great difficulty. The threads should be greased at least twice each year. A vigilant watch is kept of all hydrants during the cold period, to prevent freezing.

I desire to call your attention to the item of \$495 37 in the financial statement for electric power, recharging batteries and services rendered by the Rutland Railway Light and Power Company for work on

By old hose, junk, etc., sold	110 00
	<hr/>
	\$11,325 67

An inventory of the Department and property on hand shows a total value of \$23,664 88.

POLICE DEPARTMENT

The personnel of the department consists of one chief, four regular patrolmen, and forty-one specials. The chief serves also as a patrolman.

The special officers are available for special work and substitute for regular patrolmen when necessary; their services are also available in any part of the city to perform the full duty of a regular policeman whenever occasion arises.

The number of arrests during 1912 totals 503, of whom 9 were females and 494 males. The offences are tabulated as follows:

Intoxication, first offense	239
Intoxication, second offense	41
Intoxication, third offense	94
Breach of peace	41
Larceny	23
Burglary	6
Rape	3
Truancy	1
Vagrancy	12
Illegal furnishing of liquor	13
Forgery	1
Assault	2
Short weight	2
Loitering about R. R. Station	1
Adultery	3
Illegal use of dynamite	1
Impeding	2
Overspeeding automobile	6
Indecent exposure	1
Robbery	6
Violation of the blanket act	2
Extorting money	1
Breaking jail	1
Detained as a witness	1

503

During the past year nineteen front and twenty-two back doors to business houses have been found unlocked by the night patrolmen. Considerable property has been recovered and returned to its owner.

There are few cities in New England which maintain a police force as small as ours according to population. Rutland has approximately one regular officer for every 2,500 of its population. Burlington City has one regular officer for every 1,000 population. In round

numbers Burlington City Police Department costs approximately \$1.00 per capita, while the Rutland department costs less than 33 cents per capita. We think this a splendid showing financially. We are of the opinion that our police force should be increased by the addition of at least one regular patrolman. We have found it necessary in the past year to employ one special officer for night duty a greater portion of the time. We have been fortunate in being able to find a man who is willing to serve half-time. With the addition of an extra man, the police headquarters would have a man on duty there to answer calls at any time, day or night. This we consider of importance, especially to the people in the residential section who frequently desire the services of an officer and are unable to get in touch with the department.

The watchman's clock flashlight and telephone system is a valuable asset to the department.

FINANCIAL

The expense of maintaining this department is as follows:

Pay roll	\$4,677 24
Telephone service tolls and repairs	\$133 48
Attorney, drawing contract	5 00
Batteries	15 37
Office supplies	3 76
Team hired	4 50
Rubber coats	37 50
Repairing coats	9 25
Disinfectant	11 02
<hr/>	
	219 88
<hr/>	
Total	\$4,897 12

The inventory of the property in this department is on file with the City Treasurer and totals \$509 40.

Respectfully submitted,

D. E. MARTIN,

Commissioner of Public Safety.

Report of the City Attorney

To the Honorable City Council:

In addition to my report of last year, which may be substantially made a part of this report, the following suits were brought in which the City is interested.

Ranberg v. City of Rutland; this was a suit to recover damages on account of the flowage of plaintiff's land from alleged defective drainage of the public highway. This case was settled for a sum less than the estimated cost of trial, and discontinued under a stipulation whereby the plaintiff obligates himself to care for the situation in the future and save the City harmless on account thereof.

Creed and Burton v. the City of Rutland; this suit was brought to recover an amount claimed under a contract for construction work. It was tried at the September Term of the Rutland County Court, judgment rendered against the City, exceptions taken and the cause passed to the Supreme Court where it is now pending.

During Mr. P. W. Clement's administration as mayor a contract, approved by the Board of Aldermen, was entered into by him for the purchase of the Ellen Rooney farm, so called, in Mendon. Mr. Clement believed that the terms of the contract had not been complied with by the other party thereto and refused to take the land. The administrator of the estate of Ellen Rooney brought suit at law to recover damages by reason of Mr. Clement's alleged failure to keep his contract, which suit is now pending in the Rutland County Court.

The suit has been enjoined by the Court of Chancery and the questions involved are yet to be heard.

The City Charter was amended by the Public Service Commission in accordance with the provisions of an Act of the Legislature in 1910, providing that the City Council could condemn land within and without the City to be used in connection with its water supply. It was thought by some that the law of 1910 in that behalf was unconstitutional and that a test case might be brought to have the question decided. This was not done, but at the request of Mayor Howe I drafted an act embodying the same provisions in regard to the water supply and its appurtenances, which was introduced at the present session of the legislature by our City Representative, Mr. Hulett, which was passed and settles the question without recourse to litigation. I may add that since the passage of this act the Supreme Court has advised the Governor that the law of 1910 above referred to was unconstitutional.

The City has from time to time contributed money towards defraying expenses of an annual carnival. There did not seem to be any lawful authority for appropriation in that behalf and at the request of Mayor Howe I prepared an act authorizing the Aldermen to appropriate money for such purpose, provided the City so voted at a meeting duly warned in that behalf. This act was presented to the present session of the Legislature by our City Representative and became a law.

An act was introduced at the present session of the Legislature providing that land acquired by purchase or condemnation by one municipality within the territory of another shall be subject to taxation. This act, if passed, would render our entire water supply, aqueduct, reservoirs, and all improvements connected therewith, amounting in value to many thousands of

dollars, subject to taxation by the towns in which they are situated.

At the request of Mayor Howe, I took measures to oppose the passage of this act and the legislative committee to which the act was referred, reported that the same should be amended so that water supply, reservoirs, aqueducts, pipe lines, machinery, apparatus and all improvements connected therewith necessary for the protection, maintenance and operation of the same shall be excepted from the provisions of the act, and if any act is passed in that regard I think it will be substantially in that form.

Respectfully submitted,

P. M. MELDON,

City Attorney.

brooms, 6 chamber mugs, 1 hot water bottle, 1 eight
day clock, 28 knives and forks, 25 spoons, 3 stoves, 1
churn, 1 Stoddard creamery, 1 office desk, 1 office table,
1 Howe scale, 1 refrigerator, 4 milk pails, 9 flat irons,
2 dippers, 43 bread tins.

Respectfully submitted,

PETER BROSSEAU,

Overseer of Poor.

Report of the Board of Health

To the Honorable City Council:

Your Board of Health make the following report. We believe that there should be a system for collecting garbage, inaugurated by the city. The former Health Officer spent considerable time and corresponded with many Boards of Health, relative to this subject, and from information thus obtained, our Board formulated an ordinance, which we recommended to your Honorable Board, for consideration and adoption.

We hope this subject will be taken up in the near future.

We also urgently recommend, that the sale of meat, fruit, vegetables, milk and cream, and the inspection of meat and meat products, be considered. Our Board formulated some ordinances pertaining to this matter and referred them to your Honorable Board for action. We still feel that this subject should have early consideration, and some action taken accordingly.

There have been some unusual expenses, due to a threatened epidemic of Small Pox, and we are happy to say that the situation was handled successfully and no serious outbreak took place. We found the very comfortable and commodious Isolation Hospital of great advantage in caring for these cases.

We still recommend that something more permanent should be done, in the way of securing better water for the City of Rutland, as the use of the bleach, as at present applied, should be regarded as only a temporary makeshift.

In the spring of 1911 the Board made an exhaustive investigation of the water supply, including its sources and recommended among other things, in a communication to Mayor Clement, that the City acquire the North Branch of Cold River, and conduct the water into our system.

The Board still maintains the same view of the situation.

Respectfully submitted,

CHARLES A. GALE, M. D., Pres.

FRANK H. CHAPMAN,

FRANK D. WHITE,

F. H. GEBHARDT, M. D., Sec'y.

Report of City Health Officer

To the Board of Health of the City of Rutland, Vt.:

Gentlemen:—I have the honor to herewith present to you the report of the workings of the Health Department for the year ending December 31st, 1912, containing a tabulated report of statistics together with a detailed report of the results of daily water analysis, made by the State Laboratory of Hygiene at Burlington.

Having held office for such a short time, I have no recommendations to make, at present.

CAUSE OF DEATH.

No. 1.—General Diseases.

Cancer of breast	2
Cancer of stomach	1
Cancer of liver	4
Cancer of Intestine	1
Diabetes Mellitus	4
Diphtheria	1
Leuomenia	1
Rheumatism	1
Sarcoma of thigh	1
Senile gangrene	1
Septicemia	1
Tubercular meningitis	1

Tuberculosis—general	1
Tuberculosis of lungs	8
Typhoid fever	1
Whooping Cough	1
Total	30

No. 2.—Diseases of the Nervous System:

Acute meningitis	1
Cerebral abscess	1
Cerebral embolism	3
Cerebral hemorrhage	11
Cretinism	1
Encephalitis	1
Poliomyelitis anterior	2
Senile dementia	1
Transverse Myelitis	1
Total	22

No. 3.—Diseases of the Circulatory System:

Angina pectoris	4
Arterio Sclerosis	5
Organic disease of heart	30
Pericarditis	1
Total	40

No. 4.—Diseases of Respiratory System:

Acute bronchitis	1
Acute pulmonary edema	2

Laryngismus stridulus	1
Pneumonia	26
Pulmonary hemorrhage	1
Total	31

No. 5—Diseases of the Digestive System:

Acute gastric dilatation	1
Acute Gastritis	1
Appendicitis	1
Chronic gastric enteritis	1
Enteritis under 2 years	4
Gastro-enteritis	6
Intestinal fistula	1
Intestinal obstruction	2
Strangulated hernia	3
Tubercular peritonitis	1
Total	21

No. 6—Diseases of the Genito-Urinary System:

Carcinoma of bladder	1
Chronic cystitis	1
Chronic interstitial nephritis	16
Sarcoma of Kidney	1
Tuberculosis of kidney	1
Total	20

No. 7—Diseases of Reproductive Organs:

Cancer of Uterus	1
Pelvic Abscess	1
Total	2

No. 8—Diseases of Early Infancy:

Anancephalic monster	1
Hydrocephalus	1
Patent foramen ovale	2
Premature birth	9
Pressure on vagus nerve	1
Total	14

No. 9—Senile dissolution

12

No. 10—Violence:

Accidental burns	3
Accidental drowning	1
Accidental electric shock	1
Accidental gunshot wound	1
Accident R. R.	8
Fracture of skull	1
Fracture of Neck	1
Fracture of spine	1
Suicide by hanging	1
Total	18

No. 11.—Ill-Defined:

Cancer	3
Convulsions	3
Malnutrition	4
Shock	3
Uremia	1
Unknown	5

CIRCULATION

The circulation of books for 1912 was 62,143 as against 60,477 in 1911. The gain was a slight increase in the circulation of the following classes, magazines, Religion, Miscellany, Fiction, Travel and Political Science, while the decrease was also a slight one in the circulation of French books, no new volumes having been added the past year. Fine Arts, History and Useful and Industrial Arts. A large part of the increase in circulation for 1912 comes from the children's department, they having drawn 772 more books than in 1911, and 350 of these volumes were non-fiction. During the year 15 out-of-town subscription cards, covering both study clubs and private individuals, have been borrowers of non-fiction from the library. The towns represented are: Castleton 6 cards, Ira 1, Fair Haven 2, West Rutland 2, Poultney 1, North Clarendon 2 and Danby 1.

ADDITIONS.

We have added by purchase 419 volumes during the past year, 230 of these being works of non-fiction and 130 fiction for the main library while of the 59 volumes added to the juvenile department 27 are non-fiction and 32 fiction. 99 volumes of fiction taken from our renting list were added to the regular shelves. The magazine list is a long one but as 4,451 numbers either

bound or single copies circulated during 1912, we do not feel justified in shortening the list, the gifts of 29 additional magazines covering a field of current interest from the Boy Scout Magazine to Illustrated London News are very much appreciated by the Library Association.

BINDING.

230 volumes have been re-bound this last year as against 434 in 1911. The buying of nearly all fiction and juvenile books as far as possible in re-inforced binding has been plainly felt this year, also 1,010 books as against 1,273 in 1911 were repaired at the library

REGISTRATION.

Of the 640 new cards issued during 1912, 343 or more than half the number were issued to children, and it is interesting to note that the circulation of non-fiction in the juvenile department is 31 per cent as against 26 in the main library. The Story Hour helps to stimulate the non-fiction reading among young people.

READING AND REFERENCE DEPARTMENT.

In the main reading and reference department, an imperfect registration shows that 7,639 people as against 7,298 made use of this room during the year.

BULLETINS.

A bulletin of the 1,071 volumes added from 1910-1912 was printed during the year, also a cumulated volume of all bulletins issued from May 1899 to date was bound.

Subjects of current interest have been posted from time to time on our bulletin boards, among which are the following:

James Whitcomb Riley week celebrated by libraries throughout the country, with portrait and views of his

birthplace, present home and list of principal poems and where they may be found.

Portrait of General Booth, head of Salvation Army, with sketch of his life and work.

Notices and lists of new books.

View of Titanic disaster.

Pictures of Modern Art, etc.

ACCESSIONS.

Among the more important books added during the year are the following:

Ross: *The Changing Chinese*. "Inexpensive homes of individuality." Bullock, "Selected articles on child labor." Ellis, ed., *Norwich University*, 3 vols. Fitchett, *The great Duke Wellington*. Judson, "Myths and legends of Alaska." Dunton, Nancy Lee. Gregory, *Irish folk history plays*, 2 vols. Antin, *The promised land*. Talbot, "Moving pictures." Aikens, "Home nurses handbook of practical nursing." Montessori, *The Montessori method*. McAfee, "The greatest English classic." Gilchrist, *Helen over-the-wall*. Stovey, "Reform of legal procedure." Castle and others, "Heredity and Eugenics." Grenfel, "The Adventure of life." Bullard, "Panama, the canal, the country." Hart ed., *The American Nation*, 27 vols. Bryce, "South America." Paine, Mark Twain, 3 vols. Sheldon, "Wilderness of the North Pacific Coast Islands." Carrington, *Fresh air and how to use it*. Alcott, *Children's Reading*. "Who's Who 1913." Chaucer, *Complete poetical works* now first put into modern English by J. S. P. Fetlock and Percy McKaye.

The Library wishes to make special attention of the kindness of the Press, in the service generously given by both Rutland Herald and Evening News.

LUCY D. CHENEY,

Librarian.

Treasurer's Report of Rutland Free Library Association

To the Honorable City Council:

Following is the report of Mrs. E. P. W. Brehmer, treasurer:

RECEIPTS.

Balance from 1911-12	\$1,011	51

Respectfully submitted,

MRS. E. P. W. BREHMER,

Treasurer.

I have examined the above accounts and find them correct as stated.

HELEN B. SMITH,

Acting Auditor.

ANNUAL REPORT

OF THE

SCHOOL COMMISSIONERS

AND

SUPERINTENDENT OF SCHOOLS

OF THE

CITY OF RUTLAND

FOR THE

YEAR ENDING DECEMBER 31

1912

School Calendar

1912-13

(38 WEEKS)

FALL TERM

Fall Term begins Monday, September 9, 1912, and ends Friday, December 20, 1912—15 weeks. Vacation, 16 days.

WINTER TERM

Winter Term begins Monday January 6, 1913, and ends Friday, March 28, 1913—12 weeks. Vacation, 9 days.

SPRING TERM

Spring Term begins Monday, April 7, 1913, and ends Friday, June 20, 1913—11 weeks.

SCHOOL SESSIONS

For the grades 9 to 12 o'clock a. m. and 1:30 to 3:30 o'clock p. m.

For High School 8:45 to 12 o'clock a. m. and 1:30 to 3:00 o'clock p. m.

Holidays: Columbus Day, Thanksgiving Day, Washington's Birthday and Memorial Day.

No-school signal: six blasts on the fire whistle (— — — — —) given at 8 or 11:30, closes first four

grades for the half day following. The same signal repeated—no session in any school for the half day following.

Regular meetings of the Board of Education, first Monday evening of each month at 7:30 o'clock. Superintendent's Office, High School Building.

Office hours of Superintendent of Schools, 8:30 a. m. to 10 a. m. on school days; Saturdays during the term time from 9:00 a. m. to 12:00 m. Office, High School building.

Board of School Commissioners CITY OF RUTLAND

Organized July 1, 1912

PRESIDENT, E. C. JOHNSON, 17 Madison St.

Report of the President

OF THE

Board of School Commissioners

To the Citizens of the City of Rutland:

We hereby submit the customary annual report of the schools of this city. The supervision and management of the schools are to a large extent under the immediate charge and direction of the Superintendent who has made a somewhat detailed report of the work during the past year and his report we commend to your careful consideration.

FINANCIAL STATEMENT.

The financial statement for the year ending December 31st, 1912, made by the Finance Committee of the School Board, is attached to this report.

You will note that the gross receipts for the support of the public schools in this city during the past year have been \$56,379.28. Of this amount \$47,754.36 was realized from city taxes \$5,357.75 from the State, and the remainder, \$3,267.17, from tuitions, sale of books and supplies, and other sources. The total expenditures were \$56,155.99. Of this amount \$44,082.12 was paid for salaries, \$4,948.50 for text books and supplies, \$1,716.04 for repairs, \$4,102.30 for fuel and lights and \$1,307.03 for sundries. The unexpended balance to the credit of the School Board, December 31st, 1912 was \$223.29.

On the above-named date there had been contracted bills to the amount of \$3,442.76 to be paid in January,

1913, as follows: salaries for one-fourth month \$1,014.78, fuel \$2,307.43 and sundries \$121.75.

The Board of School Commissioners has conducted the schools during the past year with the greatest economy and along strictly business lines. Basing its estimates upon the resources of the preceding year, the Board had expected, in accordance with charter restrictions, to close the financial year with all bills paid. With this in view school supplies were purchased for the fall term only; two hundred tons of coal needed up to January 1st, 1913 were purchased and paid for on delivery, five hundred tons needed after January 1st were delivered in August to be paid for out of the appropriation of 1913. Had the schools received in 1912 the same rebates from the State which they received in 1911 the school department would have closed the year with a small surplus, but the state rebate on reserved funds in 1912 was \$1,150 less than during the preceding year and for this reason the Board was able to pay only three-fourths of the December salaries. All other bills could have been met by the unexpended balance of the city appropriation for schools without anticipating the amounts accruing to the schools for one-half year on account of state taxes, state appropriations and income from state school funds.

SCHOOL PLANT.

We are able to report that the school buildings and grounds in this city are in general in good condition, the school rooms attractive and well cared-for. While this condition is gratifying to the Board it must be remembered by the patrons of the schools and by the tax payers of the city that a school plant costing in the aggregate several hundred thousand dollars, subjected to the continued and exacting uses of the schools and the public,

and adequate to the needs of a growing and prosperous city, requires constant and watchful attention and a considerable outlay for up-keep each year. Two school buildings are still without modern system of heating and ventilation, the furnaces in four other buildings have now been in constant use for more than twenty years without extensive repairs and several school buildings will need painting and other repairs during the ensuing year.

To meet the ordinary repairs on the buildings the school funds are sufficient, but to meet extraordinary improvements such as enlarging a school building or modernizing the heating and ventilation plant, the present resources of the schools are not adequate.

The Board will continue, as it has done in the past, to faithfully guard and care for the school plant and to make improvements from time to time as the condition of the school funds will warrant without calling upon the citizens for additional appropriations except for extensive improvements or to meet unexpected outlays.

ADDITIONAL SCHOOL ACCOMMODATIONS.

Five years ago the city was called upon to erect a new school building and to furnish additional accommodations for the High School. The new building made possible the consolidation of six schools formerly housed in two antiquated and dilapidated buildings and to meet the growth in that section of the city; the enlargement of the High School Building was necessitated by the rapid growth of that school.

Since that time the population of the city has increased nearly fifteen hundred and the school enrollment, about three hundred. The greatest increase in the city in population and in building operations has been in

the vicinity of the Lincoln School which has now become greatly overcrowded.

The School Board at its meeting in December instructed the Committee on School Buildings to investigate the need of additional school accommodations, to secure estimates of cost and to report to the full Board.

The Committee on Buildings carefully investigated this matter and recommended an addition of two rooms at the Lincoln Building and the fitting up of one additional room in the Pine Street Building. The estimated cost of these improvements, based upon different plans submitted, ranged from about \$8,000 to \$13,000.

The full Board unanimously adopted the above report and voted that the city be asked to issue \$15,000 school bonds to carry out the recommendation of the Board and to make additional repairs upon the heating plants in the Pine Street and the Longfellow School buildings.

THE OBJECT OF PUBLIC EDUCATION.

Every state and city should be vitally interested in the public schools. In fact the public school in Vermont is a child of the State receiving a large share of its support from and to a large degree still controlled by the State. The object of public school instruction is to improve the citizenship and to make life richer and fuller for all the people of the State.

The aim of our schools, therefore, should be to afford the greatest and fullest advantages to the largest number of children of our city, and so far as practicable offer equal advantages to all children. The question might, therefore, be raised whether the schools in this city are at present doing all in their power to help those children not intending to enter college in securing honorable and

remunerative occupations on leaving school, which can only be done by putting vocational training upon a par with college preparation.

Respectfully submitted,

EDWARD C. JOHNSON,

President of School Board.

February 3, 1913.

Totals, 1910-11	64	2158	1948.6	1825.2	93.7
Totals, 1909-10	64	2259	1952.7	1827.6	93.5

General Average of the State, 1911-12 92.

FINANCIAL STATEMENT.

Total resources for school, 1912	\$56,379 28
Total expenditures for schools, 1912	56,155 99
Balance unexpended December 31, 1912	223 29
Average cost per pupil based on enrollment	26 16
Average cost per pupil based on the average membership	28 23
Expense for free text books and supplies less rebates	4,348 50
Expense per pupil based on enrollment	1 98
Expense per pupil based on average membership	2 14

The above statistics are based upon the latest returns to the City Clerk and to the State Superintendent of Education; compared with those of last year they show that during the natural school year the membership and attendance each increased more than forty and that during the current school year the enrollment, member-

ship and attendance each increased more than fifty over the corresponding data of the preceding year. The percentage of attendance to the membership likewise shows an increase over former years and has now attained the high average of 94.1 per cent, which is above the general average both in this State and throughout New England.

SCHOOL PLANT

The school census last June gave a total of 3113 children in this city between the ages of five and eighteen years; this is an increase of two hundred eighteen over the number reported four years ago. The enrollment in the schools during the first semester of the current year is seventy-nine more than during the same period last year. The greatest growth in population and in building operations in the city during the past five years has been in the vicinity of the Lincoln School, where seventy new dwelling-houses have been erected, thirty-six of which have been built within the past two years. The Lincoln Building for several years has been unable to accommodate all the pupils living in that vicinity and it has been necessary each year to send away from that section to other schools an increasingly larger number of children. The Pine Street building is likewise overcrowded and the same process of scattering the school children has been repeated year after year. This building was temporarily relieved by abolishing the Kindergarten School and using the room thus vacated for the grades.

The members of the Board of School Commissioners are unanimous in recommending that an addition of two school rooms to the Lincoln Building be made this summer and that an additional room be fitted up in the Pine Street building. These improvements would at once relieve the congestion in the Lincoln, the Pine

Street, the Longfellow and the Watkins Avenue School buildings.

I heartily indorse the recommendation of the Board and believe that such improvements should be completed so that one new school could be opened next September in each of the Pine Street and Lincoln School buildings. The School Board also finds extensive repairs necessary upon the heating plants in the Pine Street and the Longfellow School buildings and that these improvements can not be made without an additional appropriation from the city. The Board, therefore, appeals to the voters of the city for an extra appropriation to meet these unusual demands.

FINANCES

In order to erect and equip the Dana Building and the High School addition the School Board was obliged to expend ten thousand dollars in addition to the amount realized from the bond issue. This created a deficit in the School Department of more than five thousand dollars. To clear up this deficit under the new charter restrictions and to provide for the increased cost of running the schools occasioned by the rapidly increasing school population, the high cost of living and the more exacting demands of the public, required on the part of the School Board the most watchful attention and the exercise of the greatest economy in conducting the schools. The Kindergarten Schools were abolished thus dispensing with the services of four teachers and doing away with the necessity of renting outside rooms for those schools; the membership of each school was increased to the capacity of the room, to prevent the opening of new schools; the extension of work in the new departments and the beginning of new enterprises were deferred. Thus the deficit has been eliminated and the School Department placed upon a sound financial basis.

EDUCATIONAL POLICY

The school system of a city must keep pace with the increase of the population and with the demands of the State law and of society. The social and industrial conditions in New England have wonderfully changed within the last half century and more and more the schools of to-day are forced to supplement or even to undertake the training that was formerly secured in the home and on the farm. The Rutland of to-day is vastly different from the Rutland of a few decades ago and the training of her children in school must necessarily differ widely from the training our fathers received. The School Board of Rutland has recognized the changed conditions of our citizenship and has tried to shape our educational policy to meet the present-day demands and at the same time keep the work in our schools in line with that done in the best schools elsewhere. A beginning has been made in vocational training by establishing Commercial and Teacher Training Courses in the High School and by teaching the rudiments of Domestic Science and Manual Training in both the grammar grades and the lower grades of the High School. The results secured in vocational training in our schools have fully justified the expenditures of time and money that have been given to those branches and warrant an even larger expenditure in the future. The business department is in need of additional teaching force, the course in Domestic Science should be extended and enriched, the Teacher Training Course should be encouraged, and a separate building, equipped with modern machinery for wood and metal working, should be secured for the Manual Training Department. The School system should be extended in other directions. A city of the size and importance of Rutland should at once make provision for one or more evening schools for the benefit of those

whose early education has been neglected but who now desire to renew their studies. Vacation schools could be undertaken with profit. Vocational training should be extended and receive substantial encouragement from the manufacturers and business men of our city. The school plant should be utilized to its fullest extent in the general education and enlightenment of all the people and especially in presenting clearer and higher ideals to the children, thus preparing them for the life of to-day and for the vocations to which they may be called to enter later.

Doubtless not all these objects can be attained at once but by slight re-adjustments of educational energy and money much can be accomplished to bring about these desired results.

TEACHING FORCE

The policy of filling vacancies in the teaching force with trained and experienced teachers only and to pay the salary that such teachers and positions command has been adhered to during the past year. Four vacancies have been filled as follows: one by college graduate, one by normal school graduate of a four years' course, one by a specially trained teacher and one by a teacher of ten years' experience and a holder of a first grade certificate.

The teaching force is now exceptionally strong and the work of the schools continues upon a high plane of efficiency.

Twenty-one teachers now hold life certificates which show that the holders have taught in this State in excess of five hundred weeks. The present teaching force consists of the following:

High School teachers	15
Grade teachers	42
Special teachers	6
Total	63

The teachers prepared for their professional duties as follows:

	1909	1913
College-bred	7	11
Normal-trained	6	11
Pupil teachers	15	13
Academies and high schools	24	22
Special training	10	6
Total	62	63

PENSION FOR TEACHERS

The State has recently enacted a law allowing towns and cities to pay out of moneys raised for school purposes, pensions to teachers who have taught thirty years in the public schools in this State, and it has also made provision for the establishment of a retirement fund for teachers who have taught in the State twenty years and are incapacitated for longer service.

The State Teachers' Association and the State Women Teachers' Club of Vermont strongly indorse these laws and through the efforts of the Rutland teachers and their friends nearly one thousand dollars has been raised and turned over to the State Retirement Fund for teachers.

One of our teachers has already taught in the public schools in this State in excess of thirty-one years, two other teachers, in excess of twenty-eight years, and eighteen other teachers, in excess of five hundred weeks, which entitles such teachers to life certificates.

PARENT-TEACHER ASSOCIATION

Under the direction of the National Congress of Mothers, Parent-Teachers Associations have been formed in connection with each school in the city; the aggregate membership of these associations at present is in excess of four hundred; meetings are held each month for study and for mutual conference.

The avowed purpose of these Associations is to work for the good of the child in home and in school and to bring the parents and teachers into more helpful relations to each other.

VACATION SCHOOL

A Continuation School was conducted for four weeks at the close of the Spring Term for the benefit of pupils in the intermediate and grammar grades who had not been regularly promoted.

Special emphasis was given to English and arithmetic; geography and history received attention incidentally as supplementary reading. Fifty-nine pupils were enrolled and forty-two were promoted to the next higher grades, and almost without exception these pupils have held their grade and made good in their studies.

A most successful Convention of the Vermont State Teachers' Association was held in this city October 24-26th. About eleven hundred teachers were registered and a still larger number attended the meetings. The holding of such meetings in this city in the future is rendered easier by the completion of a suitable and commodious Convention Hall and by the cordial hospitality extended in the past to visiting teachers.

HIGH SCHOOL

The Rutland High School continues the largest secondary school in Vermont. The enrollment and mem-

bership for the current school year have each exceeded four hundred, the teaching force includes fourteen teachers on full time and six teachers on part time and the expense for maintenance is about \$17,500 or 31 per cent of the entire expenditure for all the public schools in this city. The teaching force as a whole is strong and efficient and the work attempted in each of its departments is well done.

The recommendations in my former report relative to inadequate office room and the need of a modern system of heating and ventilation in the building is renewed in this report.

The public High School is often spoken of as the "People's College"; its object is to develop and train the children for better citizenship and for more complete living. Since its support comes from taxation of all the people, its aim should be to offer, as far as practicable, equal advantages to all the children who are entitled to enter the school and to place emphasis upon those studies that contribute most in attaining the objects for which the school was established.

With no desire to detract from the good work at present being done in any department of our High School or to minimize the importance of any study taught, I feel it my duty to make three recommendations in regard to the scope of the work that should be attempted in the future.

1. Basing my judgment upon the results of examinations made in other schools for this purpose, upon my own observation of the work in High Schools in general and upon my experience of thirty years in public school work in New England I am convinced that pupils in general up to the time of entering High School have not the mental development necessary to thoroughly

master any study and that most pupils are better qualified in reading, writing, arithmetic and technical English grammar on entering, than on leaving, High School. I believe, therefore, that greater emphasis should be given to those studies in our High School than at present especially in the two lower classes so that those pupils who may not be able to complete the entire course and graduate from the school may become more proficient in those most important branches of study.

2. The expense of maintaining the High School in this city is about one hundred dollars per day; this does not include the interest on the investment for the plant or the loss of the productive labor of four hundred students. At present ten school days are largely or wholly given up each year to examinations and recording marks. I believe the benefits derived from such examinations do not warrant such a loss of time and expenditure of money and that in the future the periods of examinations should be lessened or that the mid-year examinations should be abolished.

3. The most reliable data obtainable from the educational department of this State and from the United States government shows that less than 25 per cent of school children ever enter a High School, that less than 10 per cent graduate from the High School and that less than 2 per cent ever enter college. I am convinced that we owe it to the youth of this city to make our High School of the greatest possible assistance to those pupils who are not intending to enter college and that greater attention than at present should be given in preparing such pupil to secure and hold honorable and remunerative positions on leaving the High School.

EYE AND EAR TEST

The following data comprehend the results of the examination of eyes and ears of the pupils in the public schools of the city of Rutland, made during the current year in accordance with the State law; these data are published in the belief that they will be of interest and help to parents.

	1910	1912
Number of pupils examined	1,587	1,670
Number of pupils found defective.....	295	364
Percent of pupils found defective	18.5	21.8

Number of pupils found defective in

EYES.

Both eyes only	168	189
Right eye only	25	42
Left eye only	51	50
Total	244	281

EARS.

SPECIAL REPORTS

Annexed to this report will be found those of the Principal of the High School, Supervisor of Music, Supervisor of Drawing, Supervisor of Manual Training, Supervisor of Domestic Science, and Truant Officer. We ask your careful attention to these reports which give a general idea of the scope of work done in these various departments.

CONCLUSION

In closing this report I wish to make hearty acknowledgment of the unfailing courtesy, good will and assistance, so generously extended to me during the past year by all with whom I have been associated.

Respectfully submitted,

DAVID B. LOCKE,

Superintendent of Schools.

February 15th, 1913.

Report of the Principal of the High School.

To D. B. Locke, Superintendent of Schools:

Herewith is presented my fourth report of the Rutland High School for the year Feb. 1912 to Feb. 1913.

At first it was my intention, following the custom of former years, to recite the generally satisfactory condition of the high school in work, in discipline, and in its various activities, notwithstanding the fact that no criticism of it has been made to me by either the Superintendent or the Board of Commissioners. This fact, arguing, as it does, general satisfaction with the high school seemed to make such a recital unnecessary. There is, however, one thing to which I wish to call attention, to what may be termed a growing change of the pupils toward a higher and better quality of work.

Heretofore, there has been too noticeable a desire to "get through," to have done with school, to graduate and to be off to college, or to go out into the world—to use a commencement phrase—with too little serious thought for the fitness of the preparation. This year there is evident, to him who will see, a growing desire to do better work in order, sometimes, perhaps mostly, to be able to take up subsequent tasks with more chance of success, but sometimes, certainly, because it seemed a good thing to do work of a high degree of excellence. This growing desire for a higher quality of work is due partly to the influence of our successful boys and girls in college as they come back from time to time, partly

to the boys and girls who are making a success in various lines of business, and partly to the steady insistence of the school itself upon good work and its unwearied persistence in teaching that good work is the only right kind of work. It has been more than satisfactory to watch this change in the attitude of the pupils of the high school toward their work and it gives me great pleasure to call your attention to it, for I suppose we all agree that for a school, as for a man, it is much more important which way it is going than where it stands.

With the knowledge of this steady growth toward better things in the school it is a great satisfaction to have the information that in the improved financial condition of the school department the high school will share, both in additional teaching force, of which it stands in need and for want of which its good work has been retarded, and also in a larger and better equipment, particularly in the history and modern language departments, an equipment the needs of which I shall present in detail to you in due time. Without seeming too persistent I once more express the hope that the additional teacher will be a man who can look after the athletics as part of his work, thus putting the training as well as the chaperoning of the teams under the care of a member of the Faculty, a thing which the larger and better schools are everywhere doing. I feel very strongly about this and repeat here what I said in my first report, four years ago, that the City owes as much as that to its boys, particularly since no increased expense is involved in it.

I implied above that because of insufficient teaching force and too meager equipment the good work of the school has been hindered and while the teachers, knowing the financial situation, have all cheerfully labored to keep up a steady improvement in efficiency,

the result has not been at all what they would like to make it. In no place in the school has the result of this unfavorable condition been more clearly evident than in the work of the special teachers for which it has been impossible to give the freedom and space needed for its highest effectiveness, and I am glad to make this appeal in their behalf. To ask special teachers to do effective service and then to crowd their work off into a corner is fair neither to the teacher, to the work, nor to the school. Of course, the dropping of Algebra in the grades will help next year, somewhat, but that change affects only the entering or D Class. In the face of this situation what I said in my report last year on this point has added significance this year and the recommendations I then made, sharper point. The renewal of these recommendations will be found below.

Closely connected with this cramped and hindered effectiveness of the special teachers' work—since both involve waste of money and effort—is the matter of free English books in the upper classes of the high school to which I have always been opposed and against which I have steadily protested. There are several reasons to be urged against it. I content myself with simply *naming* some of them: (1) the expense, constantly increasing as the school increases and the work in English grows; (2) the hindrance to the work because of the lack of sufficient books; (3) the inconvenience caused by the necessity of redistributing the English texts for reviews; (4) the desirability of pupils' owning these masterpieces of English Literature; (5) the unsanitariness of soiled or dirty books.

There are other matters that ought to come to your attention but the narrow limits of a local report preclude the mention of them. Besides they may easily

and properly be brought before you and the special committees from time to time. I, however, offer the following specific recommendations:

1. A drawing room in the basement ample in size and adequately equipped with desks to give a fair chance to the excellent work in drawing by the present teacher of that work.

2. The control of the domestic science teacher's time and the institution of a worthy course in that branch of school work or the dropping out of it altogether, for the present, on the ground of inadequate returns for the present outlay.

3. The appointment of an additional teacher in the high school and that teacher a man—in the interest of right athletics—capable of looking after the boys of the school in connection with their sports, and that the oversight of the athletics be made a part of his school work.

4. The increase in the school is likely to continue as the city grows and the good reputation of the school holds and increases. For the next year, however, we shall not be seriously hampered for space and with an additional teacher and the present drawing room to be used as a recitation room for small classes we shall be able to get on very well.

In conclusion it is not only proper but pleasant to report to you the satisfaction I have felt, not only at the continued confidence of the Board in the present management of the high school but also at the special mark of that confidence given since my last report. I

am glad to acknowledge this feeling on the part of the Board, to express my sincere appreciation of it and to assure them of our best effort to make the school even more worthy of their just pride.

Respectfully submitted,

ISAAC THOMAS,

Principal.

Rutland, Vt., February 1913.

Report of the Supervisor of Music

To David B. Locke, Superintendent of Schools:

The following is my report as to the musical work in the schools since January, 1912. The first occurrence outside the regular routine was a creditable recital, given by the eighth grade of the Abraham Lincoln School, this being the second such occasion among the grades during the winter term. As work of this kind stimulates the classes to render their music with greater care and beauty these modest recitals are of certain value to the pupils, and the attendance and interest of parents and friends of the children are earnestly desired on all such occasions. Several classes of the Longfellow building joined in giving an entertainment in the High School Assembly Hall on the evening of May 15, for the benefit of the Teachers' Retiring Fund. A large audience gave generous approval of the various numbers. The music at the annual Memorial Day exercises of the grades was courageously and finely rendered although many good singers were absent owing to the untimely rain storm.

At the High School commencement the orchestra rendered the purely instrumental numbers in a gratifying manner. The choral numbers were arranged for several instruments in addition to the piano.

Upon the opening of the schools in September the voices of all the boys in the eighth and ninth grades were tested and many basses were found. Music has been written and arranged to meet the needs of these changed

voices and a real effort made to interest the boys in their new part.

Rather more material than usual was found for the orchestra, which held semi-weekly rehearsals in preparation of music for the State Teachers' Convention when they played at three different sessions. Since that time Strings and Brass have had separate weekly instruction. Nearly all are beginners so that the music must of necessity be somewhat simple, but we have some thoroughly good music of that order and most of the players are very faithful in their attendance and interest and their efforts deserve success.

I wish that by appealing to parents through the medium of this report a greater interest might be developed in the High School chorus, where the subject is elective and perhaps not carefully enough considered, although the pupils have many times had it brought to their attention. Interest in this really necessary phase of school activity seems to be declining just at the point where the work of so many years should come to fruition. I would make a strong plea for a larger chorus of thoroughly determined workers, lest we retrograde in this important subject.

The great value of music as a serious study in the schools of the country is rapidly becoming recognized. Probably all will admit its usefulness as an inspiring diversion and be glad to have the young people acquire a certain amount of proficiency in the art, while quite unaware of its exceptional value as mental discipline.

We tenaciously retain certain other studies largely for this purpose when their value from this point of view alone may not be nearly as great as that of a systematic course of properly interpreted sight singing.

A few words as to what is involved in an adequate sight rendition of a composition in several parts may

assist in making this point clear: First, every note of each part must be correct as to pitch; second, must have correct time value; third, must have proper dynamics; fourth, must be in sympathy and balance with other parts; fifth, must be of good tone quality. As all of these thought processes involving the use of the eye, ear, and voice as well as the emotional nature, take place simultaneously, we have a well-nigh perfect subject for the exercise of the mental faculties. This invaluable utilitarian phase of the study of music is, however, of secondary importance to a reasonable knowledge of the Art for the beauty and pleasure which it brings to the world.

In closing this report I would like to thank all the teachers for their friendly assistance, and remind parents of the necessity of their co-operation in urging their children to do more earnest work in this important study.

Respectfully submitted,

CHARLES V. H. COAN,

Supervisor of Music.

February 1, 1913.

Report of the Supervisor of Drawing

To David B. Locke, Superintendent of Schools:

The report of the Supervisor of Drawing for the year 1912-13 is hereby presented.

The course in drawing for the past year has followed the same lines as heretofore. While the aims of the course continue to be the same, the problems presented vary in subject matter and in method. This year an attempt is being made to correlate the work in the upper grades with the sewing and manual training, the problems being worked out on paper in the drawing classes and applied in the sewing and manual training classes. If this can be satisfactorily done, it will be a benefit to all three courses.

Last spring, the Teacher Training Class came under the instruction of the supervisor for its drawing. This made it necessary for the supervisor to drop all teaching in the primary grades. The teaching in grades one to four is now carried on by the grade teachers under supervision with monthly teachers' meetings where the outlines for the work are considered and illustrated. Great credit is due these teachers for the results obtained.

This year the increased interest in mechanical drawing in the High School made necessary the formation of seven divisions instead of six. The freehand work in the High School will remain unsatisfactory for the size of the school and the ability of the pupils as long as accommodations are so poor and so little opportunity is

given to the pupils to elect the subject. All who intend to teach should study drawing throughout their High School course and those who study mechanical drawing should have an opportunity for work in freehand.

An exhibit of the drawing of the public schools was held last spring in the Dana School building. It would gratify pupils and teachers if parents and friends would inspect more than in the past the work shown at these annual exhibitions.

The last exhibit, with the addition of work from the fall term, was displayed at the time of the meeting of the State Teachers' Association. Thanks is due teachers, pupils and janitor, who assisted in placing the Rutland and other exhibits at the Dana Building and who took charge of rooms and assisted visitors there during the Convention.

The work of all who help to make results possible is greatly appreciated. The ready and intelligent co-operation of the grade teachers and the willing response of the pupils are a source of gratification to the supervisor and of profit to the schools.

In closing the supervisor wishes to express her sincere appreciation of the kindly personal interest recently shown in so many ways.

Respectfully submitted,

MARION G. LEES,

Supervisor of Drawing.

February 3rd, 1913.

Report of the Supervisor of Manual Training

To David B. Locke, Superintendent of Schools:

In the field of vocational training, nothing offers more interest to the child than that represented by the Manual Arts and Crafts. To make things with the hands is the first instinct of the average boy. When he makes his first sled or hockey stick, he feels the spirit of genius welling up in his soul.

It is the same when he starts in school, but his desire to do things there is often stunned by a cold academic problem which confronts him. Is it not here where he starts to count the days when school will keep no longer? Every parent and every child who has come to the age of understanding realize that this is true.

Manual Training in its different lines interests the boy from the outset. His longing for a pocket knife with which to whittle is an illustration. When he gets into school and is confronted by a set of tools and a piece of wood to operate upon his heart leaps with joy. If his interests are continuously enlarged and if on reaching the higher grades he finds himself surrounded by various machines, his ambition to do things will likewise be increased. He is then on the highway to the greatest usefulness to society.

Perhaps, at this point, a question might arise whether in training the hand of the child his mind is lagging. Activity of the mind always comes with well directed activity of the body.

The boy in the pursuit of Manual Training is finding his propensity, and if it leads him to professional life, he will make a better teacher, doctor, or artist, than

he would have been without the fundamental knowledge of these activities in modern life.

Notwithstanding the several problems which confront a teacher starting this line of work and the inconveniences encountered by lack of sufficient machinery and tools, the work in this department of the school so far has been most satisfactory.

Our endeavor is to direct the younger pupils in a line of work which develops an interest in their labor by constructing simple pieces of furniture, etc., which when completed gives them a feeling of self-confidence and the gratification of knowing that their parents and friends will admire the results of their efforts. In this way a foundation for further work is established and desire is kindled to continue this line of work in the High School.

The work in the High School this year consists of simple construction and furniture making, interspersed with a brief course in the mathematics involved.

It is our hope that sufficient equipment may be installed before the beginning of a new school year, so that the High School class may have an opportunity to get a broader knowledge of this important kind of work which plays such a prominent part in the school systems in other progressive cities.

In closing, I wish to emphasize the need in the near future of a work shop with suitable and sufficient machinery so that the next years' results in this department may be even more satisfactory.

The hearty cooperation of my co-worker, Mr. Rice, has aided to a great degree in making the work this year most successful.

Respectfully submitted,

HAROLD B. ADAMS,

Supervisor of Manual Training.

Rutland, Vt., February, 1913.

Report of the Supervisor of Domestic Science

To David B. Locke, Superintendent of Schools:

A report of the work of Domestic Science for the year 1912-1913 is herewith presented.

As no change was made in the curriculum of the Domestic Science course, the work from September, 1912, has been carried on practically the same as last year. The classes started with a much larger attendance which has continued during the present school year.

Cookery is studied during the first two years in High School, which consists of laboratory experiments and lectures accompanied by practical demonstrations. A complete study of the care and cleaning of the kitchen and cooking utensils begins the work of the first year. This is followed by a detailed study of the five food principles: namely water, mineral matter, proteid, carbohydrate, and fat, correlated with the use of each in human nutrition. Particular attention is given to the preparation and baking of batter and dough mixtures. A thorough study is made of proteid and starchy foods with special lessons on beverages, soups, salads and invalid cookery. Preliminary lessons are given on table setting and serving in preparation for more advanced work during the second year.

The work of the second year begins with a study of the preservation of foods, continues with the preparation and serving of menus with definite and restricted estimates of cost, and concludes with the preparation of more difficult recipes.

In this work the girls are also taught the correct manner for table setting and they also act as hostess and waitress.

The time given to the Domestic Science work is very short and in order that the theory as well as the practical elements may be studied, the classes are asked to do some outside reference work.

Although the classes receive a large percentage of value from the work as it *now* is, if changes were made so that the elementary principles of both physics and chemistry could be taught before the methods of cookery, the classes could grasp much more readily the real theory involved.

The aim has been to emphasize the fact that simple foods always have the preference when planned thoughtfully and intelligently, and that cookery as in any other line of work should be systematized.

The sewing which is begun in the sixth grade continues for four years. The first two years comprise elementary work, the simpler stitches being introduced in the sixth grade. Note books are provided in which the pupils write from dictation the method of procedure, including the position of the work and the material and the use of the stitch. Methods of fastening garments such as buttonholes, sewing on buttons, hooks and eyes are taught.

The seventh grade work is begun with a review of the previous year, using hemming, overhanding, and overcasting to make a miniature sheet and pillow case. Hemstitching follows, then patching including the three kinds, and then darning and feather stitching. Small fancy articles are made.

The eighth grade girls make a complete doll's outfit including underwear, dresses and outside wraps.

This introduces the application of the paper pattern. Very simple garments are made for themselves.

The foundation of the eighth grade work gives the ready knowledge for the ninth grade pupils to apply themselves in making the articles of clothing for themselves which includes underwear and a cooking apron. Machine stitching is taught in this grade.

The stimulus received by the practical application of this work in the school room should assist the child who not only has no opportunity to gain such advantages at home but also the other child who may obtain some additional impetus to benefit her own surroundings.

In closing, I wish to express my sincere appreciation of the kindly interest and ready co-operation which the teachers have shown in this work and the willing response given by the pupils.

Respectfully submitted,

MARY A. HOSLEY,

Supervisor of Domestic Science.

January 26, 1913.

Report of the Principal of Teacher Training Course

To David B. Locke, Superintendent of Schools:

According to request, I am submitting a report of the work of the Teacher Training Class.

There are few enterprises worth essaying but what pass through a crucial stage, and the work of the Teacher Training Course is no exception to this principle.

Though the state magnanimously endows this course, it, nevertheless, just as inflexibly binds it about with legal requirements as to numbers. While it is not difficult to sense the significance of the law's rulings and while probably few high school authorities would feel justified in discontinuing a course because only nine requested it, yet the opportunity to train for the important work of teaching is denied as many aspiring applicants if fortune does not propitiously increase that number by at least one.

Some modification of the law has been made, however, in the present assembly so that the question of legality may not be such a burning one in the future history of the training work. The course may be given for eight, and the town or city receives equal aid from the State; or it may be retained for a smaller number and the State aid is correspondingly diminished.

The enrollment has numbered nine in the class this year.

The work has been planned to include the subject matter required by the State in much the way it was carried on last year. The work consists of reviews of common school branches, methods of teaching these branches, psychology, Vermont school law, school management, agriculture and daily work in observation and practice.

The training class in Rutland is peculiarly happy in having a primary model school consisting of the first two grades in which the beginning teachers observe and practice. The work in these grades is in charge of an experienced primary teacher and the members of the class have the advantage of seeing the supervisor's and the model teacher's methods in these—in many ways—most important grades.

The work has been taken up this year with an earnestness and spirit such as one welcomes in all work but which is indispensable to success in work that leads to equipping a neophyte for assuming the varied responsibilities that must needs come to every teacher, whether she is placed in the one-room school or at the head of an extensive school system.

In following up the work of the members of the class that trained last year, I have been interested and gratified. While it is difficult at this time to give their work an adequate estimate the consensus of opinions among superintendents is, I find, the following: it is the exception among the trained teachers who fails to make a success from the very start, while it is the exception among untrained teachers who does satisfactory work in her first school. In the greater number of cases these young women with one year's training have succeeded experienced teachers and have received the same compensation as their predecessors. In two cases the salary was increased after the fall term.

In closing let me say that I trust that the novelty of the whole system may not deter the people of the town from taking an interest in retaining a course that is fraught with benefits for them and those of the neighboring communities. If the advantage of having the course given in your schools was not merely a saving of one teacher's salary and, possibly, the substitute's salary—not to mention the inestimable value of the elevating influence of a class that has the ideals of a teacher as a goal, I would make an appeal on the ground of a crying need from your neighboring communities from which sources the citizens of your towns and cities are recruited, and whose need is recognized but not met in any better way than by sending a teacher in sympathy with the community among them to instruct and inspire them with a sense of their advantages; to teach them to know the possibilities of themselves and their environment, and to inspire them with a willingness to make the most of both.

This, in epitome, is the ideal of the course for trained teachers for rural peoples. It has some problems still to adjust and solve, but I believe it is rendering valuable service to the State.

Respectfully submitted,

MARGARET M. HEALEY,

Principal of Training Course.

February 5, 1913.

Report of Truant Officer

To D. B. Locke, Superintendent of Schools:

I beg leave to submit herewith my report as truant officer for the year ending December 31, 1912.

Number of cases reported	1,193
Number of cases investigated	1,193
Number of legal and reasonable excuses	61
Number sent to Industrial School	2

Regarding the cases reported above as having legal and reasonable excuses, I find that these absences were due largely to illness, an epidemic of colds and, in large part the small-pox scare.

From my observation I should say that the principal causes of truancy are the so-called attractions to be found in the moving picture shows and pool rooms of the city. While there is nothing inherently detrimental in children frequenting such resorts under proper conditions outside school hours, parents and guardians should withhold permission during school hours. While the educational possibilities of moving pictures must at once be recognized, there is little question that the average representations are of doubtful value to school pupils, if not positively harmful.

One of the prolific causes of truancy in former years has been a lack of suitable clothing; at all events it was the cause of materially reduced school attendance. I take pleasure in reporting that through the thoughtful care of certain charitably disposed ladies, a fund of about \$400 was placed at my disposal to supply clothing needs. This fund was administered with the greatest care, ex-

penditures being made only when donations of clothing were not possible, but regardless of all this, about \$200 were required to meet the demands. It is hoped that the relief so wisely afforded by the donors of the fund will, in the near future, completely eliminate the lack of clothing as a cause of reduced school attendance.

Respectfully submitted,

J. J. HICKEY,

Truant Officer.

Auditors' Report.

To the Honorable City Council:

The Auditors for the year 1912 would respectfully report that they have audited the books of the city clerk and treasurer, overseer of the poor, constable and collector, superintendent of schools, and sinking fund commissioners, for the year ending December 31, 1912.

We find that the books in all departments have been kept in an accurate and businesslike manner, and all money received seems to have been entered to the proper department, and there appears on file paid city warrants properly made out and duly authorized for all money paid out, and the cash balance shown as on hand is verified by said vouchers as being correct.

For a statement of the receipts and disbursements, we refer you to the detail report of the treasurer, which we have verified.

We find liabilities contracted for during the year in excess of appropriation:

School Dept. including payroll	\$4,174 60	
Less cash on hand	223 29	
		\$3,951 31

The expenditures for general account of the city exceeded the receipts by \$4,866.48.

The receipts in the water department have exceeded the expenditures to the amount of \$19,297.88, and this amount is on hand in cash to the credit of that department.

We would respectfully call your attention to a few changes, which, in our opinion, are desirable in order to put the books of the city into such condition that they will at all times show the actual financial status of the city as regards its assets and liabilities.

The auditors are directed by charter to make such a statement in their annual report, but no data are available on the books of the city from which such a statement can be compiled.

There should be made an authorized appraisal of our water and sewer system, public buildings, permanent machinery, tools and supplies of all kinds, thus having on the books of the city an intelligent and approximately accurate statement of the assets.

There is carried on the books of the city treasurer as an asset of the city an accumulation of accounts receivable dating back to the organization of the city, and amounting approximately to \$3,000. These are absolutely of no value as an asset, being uncollectible, many of them having outlawed, and in some cases parties against whom the accounts stand are dead and their estates have been settled. We recommend that the treasurer be relieved of these items at once by your direction.

We recommend that the sinking fund commissioners keep a separate account with the water fund so that their books will show at all times the amount available for redemption of bonds of that department.

C. TURNER,
THEO. A. DAVIS,
JAKE HEYMAN,

Auditors of the City of Rutland.
